

EMPOWER YOUR FINACLE SYSTEMS

WITH YETHI'S PROVEN EXPERTISE

As the digital banking landscape rapidly transforms, ensuring your Finacle systems are seamless, secure, and future-ready has never been more critical.

At Yethi Consulting, we deliver advanced Quality Assurance (QA) and test automation solutions for the Finacle Product Suite.

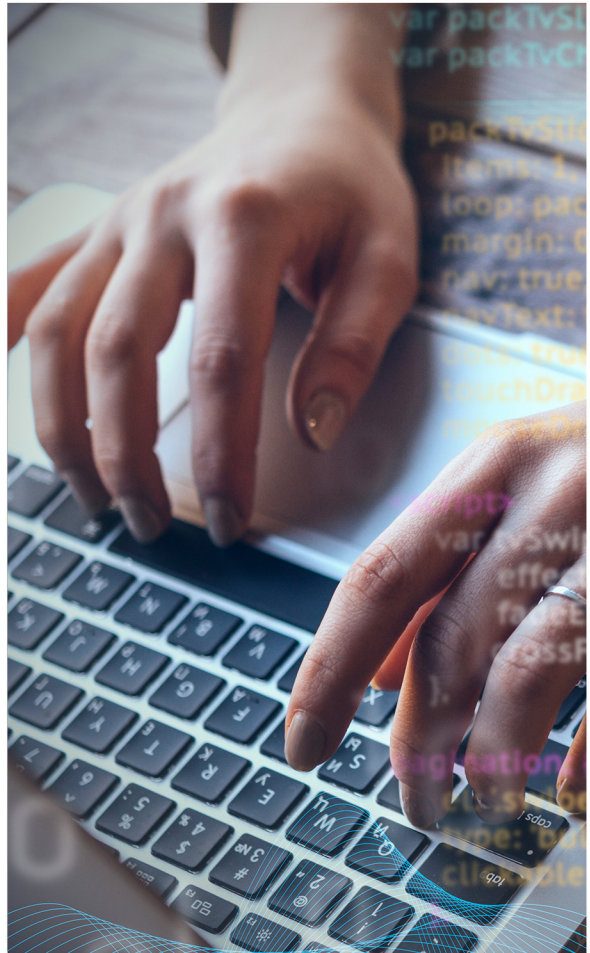

With our AI-powered Tenjin platform, next-generation QA methodologies and deep domain expertise, we ensure your Finacle systems operate flawlessly, enabling your bank to scale and innovate without disruption.

Yethi's Finacle Testing Capabilities

Comprehensive QA Solutions: Our cutting-edge QA methodologies encompass functional, performance, compliance, integration, and regression testing, ensuring complete quality assurance for your Finacle Product Suite.

Industry-Specific Expertise: With over 30 Finacle clients, our QA expertise spans Finacle retail, corporate, and private banking environments.

Global Banking Expertise: A proven track record with 130+ banks in over 30 countries, backed by more than 11 years of experience.

Key Challenges in Finacle Testing

Complex Business Logic & High Transaction Volumes: Banks face intricate business requirements, making testing highly challenging.

Integration with Multiple Systems: Finacle requires seamless integration with multiple applications, increasing the complexity of testing.

Stringent Regulatory Compliance: Adhering to various regulations and standards can make compliance testing time-consuming and resource-intensive.

Delivering Exceptional Customer Satisfaction: Finacle systems must perform efficiently under heavy loads while providing an optimal customer experience.

How Yethi Addresses These Challenges

Zero Defect Leakage: Our robust QA methodologies ensure flawless performance across all critical processes, from handling high transaction volumes to managing complex business logic.

Enhanced Performance: Our advanced functional and non-functional testing methodologies ensure seamless integration, regulatory compliance, and optimal performance for Finacle applications and systems, significantly enhancing the customer experience.

Seamless Finacle Upgrades: We provide efficient regression packs to handle frequent Finacle upgrades with minimal disruption.

The Tenjin Advantage

AI-Powered Automation: Tenjin's GenAI-powered, codeless automation streamlines the entire testing lifecycle—from planning to reporting.

Faster Time-to-Market: Tenjin reduces testing cycles, ensuring faster go-lives for Finacle implementations.

Accelerator Packs: Pre-built adaptors for the Finacle Product Suite further streamline application testing.
