

Unlock the Full Business Potential of Your Lending Systems

Take the performance of your lending systems to next level with Yethi's specialized lending system testing solutions – for banks, financial institutions, NBFCs, and micro-finance institutions.

With a focus on risk, revenue, and liquidity, systems today are able to better address credit risk, decision making, & deliver a customer experience that is convenient and on-demand across the entire lifecycle – from Loan Origination to Loan Management to Loan Collection. At Yethi, we ensure consistent performance and reliability of these systems, aligned to your business objectives and strategic growth plan.

Navigating the Testing Challenges of Lending Systems

Lending is a document-heavy process for banks and financial institutions, requiring extensive paperwork and multiple rounds of review in the underwriting stage. At the same time, transparent communication with borrowers throughout the process must also be maintained. The complex process makes the testing of these systems highly challenging.

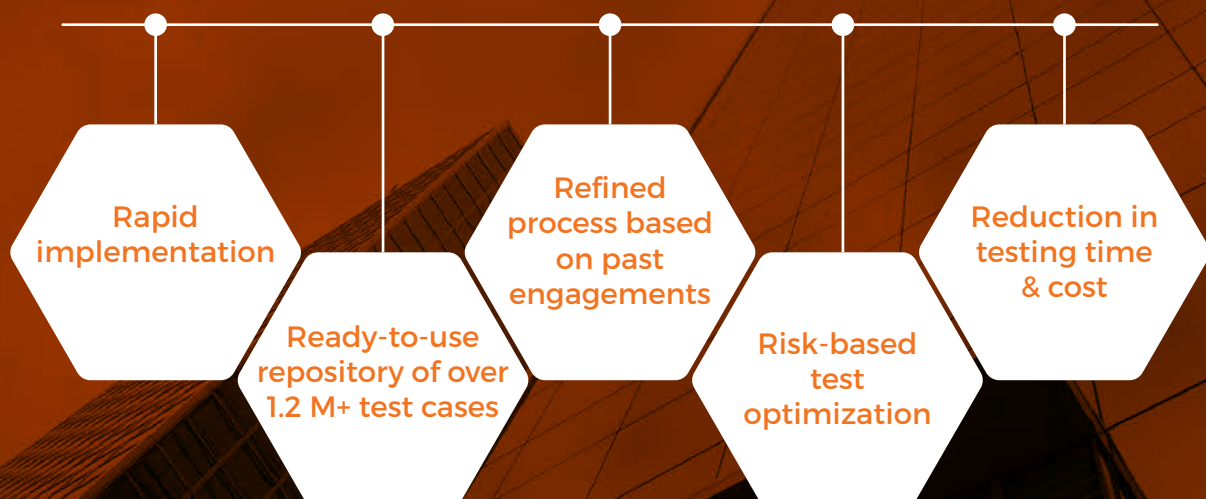

Ensuring Business Success

Why Yethi is the Industry Leader for Quality Assurance of Lending systems?

Our testing solutions for lending systems encompass a wide array of services and comprehensive test case repositories, supporting various vendor platforms, processes, and functional areas. This approach offers assured business success.

Success Story: Yethi Implements QA for a Leading Vehicle Lender in India

A leading vehicle lender in India implemented new systems for its Loan Originations, Loan Management, and Loan Collection, as a part of its Application Stack.

Challenge? The organization faced challenges in maintaining the multiple interface dependencies leading to impact on earlier tested features.

Solution. Yethi, carried out end-to-end functional testing across all phases of delivery, with the following approach:

- Process-driven test design ensuring coverage of all workflow stages, deviations and exceptions
- Requirement gap identification and recommendations from Yethi's SMEs carried out as additional activity
- Additional rounds of testing proposed and carried out based on defects identified in first round of testing in each phase

Our Offerings

- Full testing lifecycle of entire Loan Lifecycle Process, on R-Systems Indus (65 stages of Origination Process, Servicing, and Collection)
- Built and executed 15,000 unique test cases
- Performed multiple rounds of execution across different product portfolios aligned for Phase wise delivery
- Extensive test coverage achieved for each product
- Dedicated team for testing and production support
- Dedicated BA team successfully supported bank in Complete process revamping
- Periodic regression testing for the enhancements and new functionalities

Conclusion: Yethi's process led analysis and testing helped the organization to obtain Specific, Measurable, Achievable, Realistic & Timely results.
