

Advanced QA for the Digital Revolution in Banking

“
Innovation for Quality,

is at the core of everything we do. At Yethi, we embrace the uniqueness of every client challenge, delivering tailored solutions that evolve with the dynamic needs of the financial services industry. By combining domain expertise, cutting-edge technology, and a client-first approach, we help banks achieve measurable outcomes and long-term success.

”

At Yethi Consulting, we specialize in Quality Assurance and Test Automation solutions that enable banks and financial institutions to maximize ROI from their technology investments. By ensuring the performance, reliability, and scalability of banking applications, we empower our clients to deliver seamless, secure, and efficient financial services.

With over 12 years of exclusive expertise in banking applications and technology, Yethi is the trusted partner for mitigating risks, enhancing operational efficiency and delivering exceptional customer experiences. Our services address the unique challenges of the digital-first financial landscape, helping financial institutions innovate confidently and deliver sustainable value.

“ *Every transformation is only as strong as the quality behind it. We safeguard that quality so banks can innovate with confidence.* ”

- 12+ years of banking domain QA expertise
- 130+ satisfied customers
- 700+ projects successfully delivered
- 1,300+ consultants globally
- Presence in 30+ countries

Our Approach

People

Yethi brings together a powerful mix of domain and technology talent, including:

- Banking professionals with deep functional expertise
- ISTQB-certified QA specialists
- Core banking transformation experts
- Regulatory & compliance specialists
- UI/UX validation experts
- A dedicated Banking Center of Excellence that strengthens our frameworks and accelerators

This unique blend ensures precise validation and high-quality outcomes across every engagement.

Process

Backed by over a decade of BFSI experience, Yethi follows proven, scalable processes that enhance quality and reduce risk. Our **risk-based testing approach** prioritizes high-impact, business-critical areas to maximize coverage, improve accuracy, and accelerate time-to-market, all while delivering higher ROI and consistent delivery excellence.

Technology

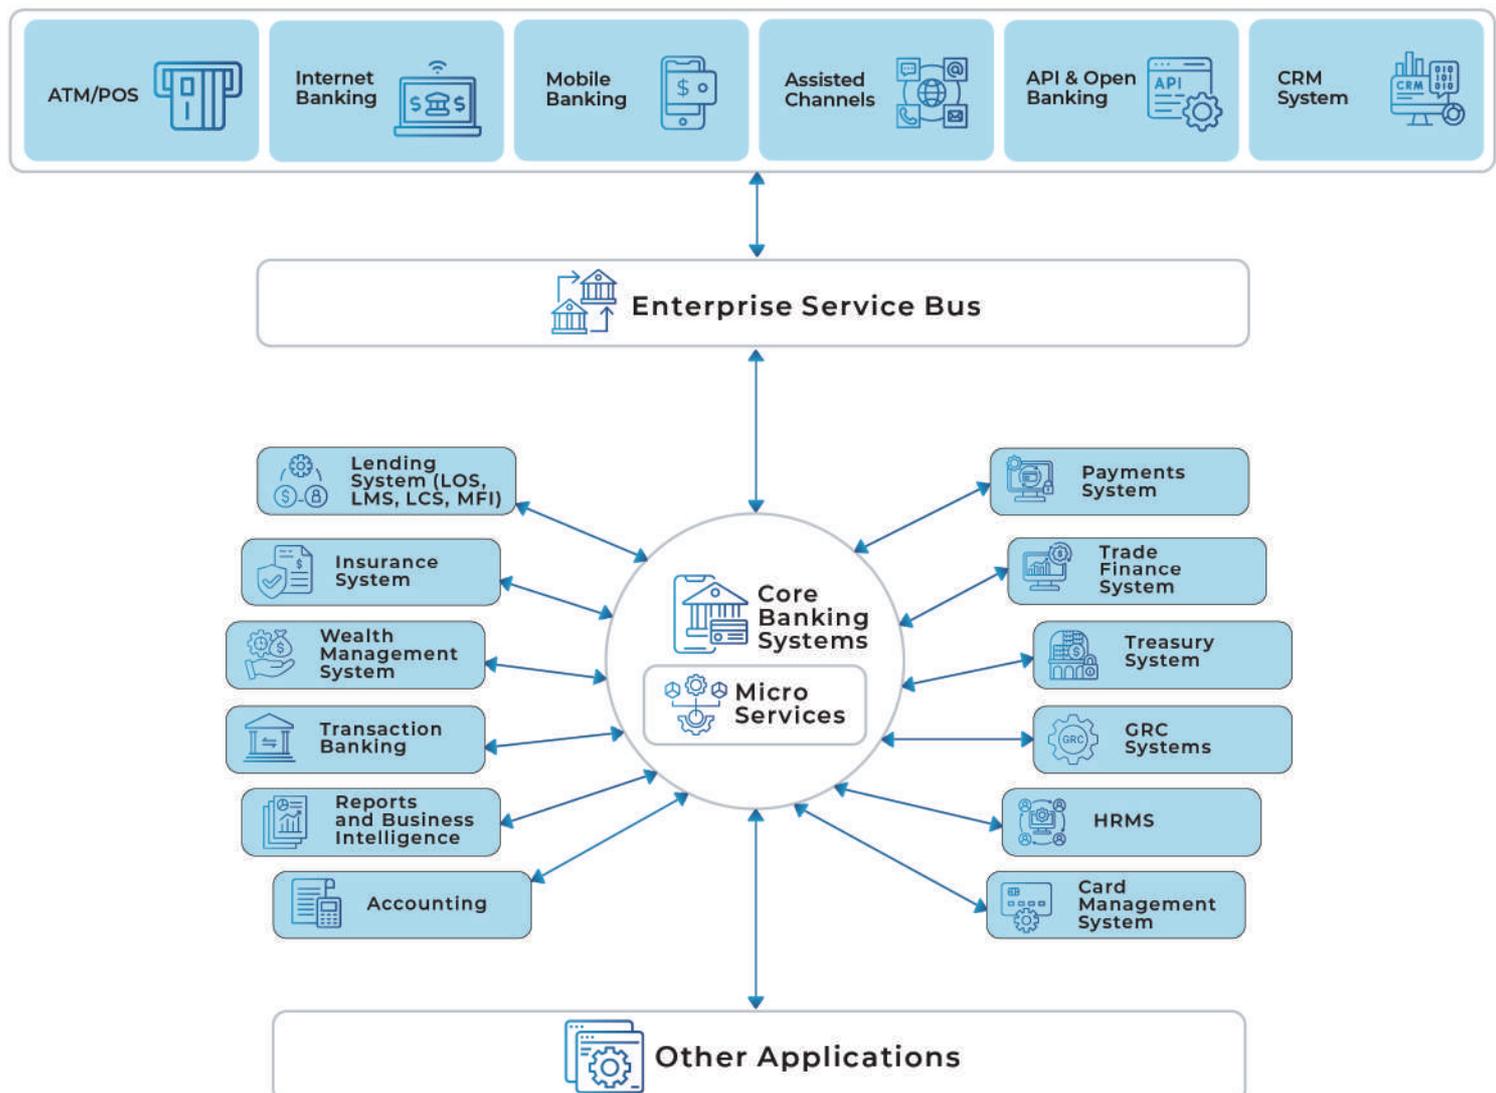

We leverage state-of-the-art tools and platforms to deliver cutting-edge solutions for the fast-paced banking industry. Our **AI-powered Tenjin Workbench** revolutionizes test automation, reducing efforts and accelerating results for unparalleled ROI.

Our Core Expertise

Helping Banks Succeed with End-to-End QA Services for Performance and Application Reliability

In a highly complex ecosystem of applications, relying on efficacy and reliability of your applications while meeting the rising demand of a tech-savvy, digital first customer is always a challenge. Quick technology turnarounds in the BFSI sector are essential for security, regulatory compliance, and successful digital transformations. We ensure performance and application reliability that meets your business needs, is aligned to strategic roadmaps, and across multiple vendor platforms, processes to ensure a successful business outcome.

We have over 12 years of expertise in the BFSI sector, covering 350 applications across 40 business areas.

End-to-end validation of multisystem & multi-Integrated environments

Tenjin Workbench — Redefining Enterprise Testing with AI

Tenjin Workbench is an AI-powered, codeless, end-to-end testing platform built to simplify enterprise QA complexity. It unifies test design, management, execution, and performance testing into one intelligent workbench, helping teams deliver quality at scale across web, mobile, API, and packaged applications.

Available on Marketplaces:

temenos

Driving Success Through Proven Results:

Up to 60% Reduction in Testing Efforts

Up to 30% Increase in Test Coverage

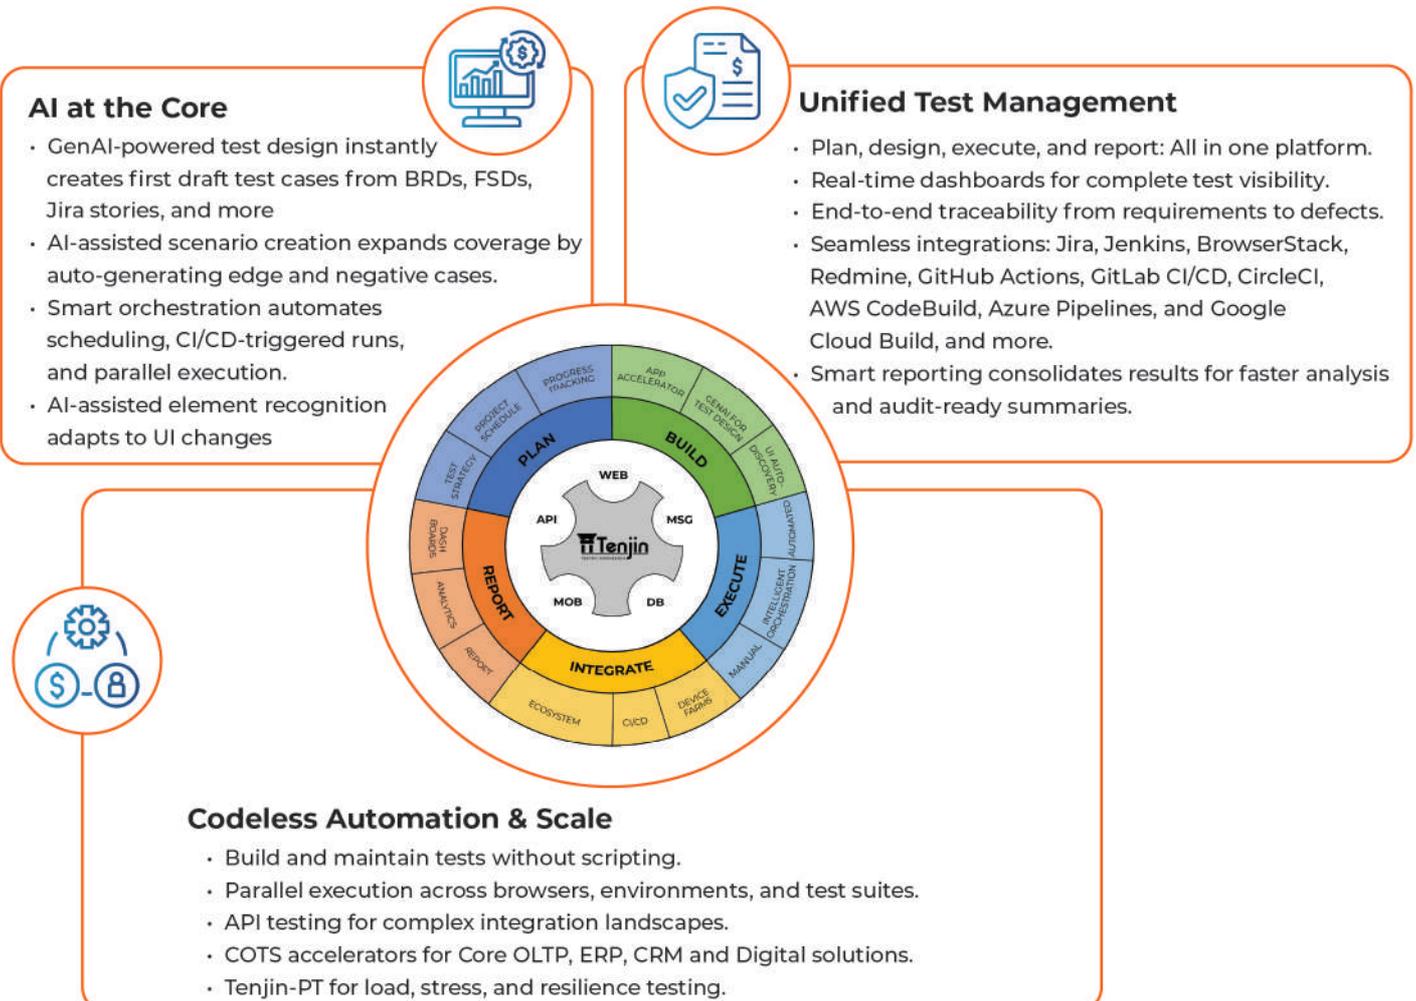

Up to 7X Faster Regression Testing

Up to 35% Reduction in UAT Efforts

Up to 10X Faster Test Design

The Tenjin Advantage

Testing Center of Excellence (TCoE)

In today's technologically driven world, ensuring the quality of applications is paramount for business success. A well-managed Testing Centre of Excellence (TCOE) is the key to achieving this goal by efficiently handling test resources and infrastructure, while also standardizing test processes. At Yethi, our team of domain experts specializes in planning and executing the entire test lifecycle, offering you a strategic approach to meet your business objectives. Our approach ensures optimal use of existing QA resources to maximize ROI.

Improve your testing processes, enhance efficiency, and drive business success

- **Diversified Platform Expertise**

Our TCoE framework is designed to support a wide range of banking platforms, including Core Banking, Lending, and Payment Systems. This ensures seamless performance validation across various environments, delivering consistent quality assurance results.

- **Process Excellence**

By standardizing QA processes and best practices, our TCoE ensures compliance with industry standards while optimizing efficiency. This approach reduces testing cycles and enhances overall application reliability.

- **Automation Adoption**

We integrate cutting-edge automation tools and frameworks to accelerate testing and reduce manual efforts. This increases accuracy, minimizes errors, and delivers faster go-to-market solutions.

- **Flexible Engagement Models**

Our TCoE offers adaptable engagement models tailored to meet the unique needs of every financial institution. Whether on-site or remote, we ensure seamless collaboration and cost-effective solutions.

The Edge of Yethi's TCoE

- **Domain-Centric Expertise**

More than a decade of experience in the BFSI sector, making us the preferred QA partner for leading financial institutions.

- **Built to Scale With You**

Our frameworks grow as your business grows, scaling effortlessly to support new teams, higher volumes, and expanding test landscapes.

- **Cost Optimization**

Streamlined processes and automation capabilities reduce overheads and maximize ROI.

- **Comprehensive Support**

From pre-production testing to post-production monitoring, our TCoE covers the entire testing lifecycle.

Why Choose Yethi?

Banking-Focused Expertise

Our exclusive focus on banking gives us unparalleled insight into the industry's unique challenges and opportunities.

Proven Results

We consistently deliver measurable outcomes, including reduced risks, lower costs, and enhanced operational efficiency for banks worldwide.

Innovation in Testing

Our AI-driven solutions set the benchmark for next-generation testing, offering faster, smarter, and more accurate results.

COTS Accelerators and Platform Readiness

Pre-built libraries, frameworks, and integrations, fostering rapid deployment and scalability to meet diverse project requirements.

Global Footprint

With a presence in 30+ countries, we combine localized expertise with a global perspective to address regional challenges effectively.

Success Stories

Leading Govt-Owned Bank with Over 22000 Branches

Challenge: Enhance application delivery and customer service.

Solution: Established a Test Centre of Excellence (TCoE) with a "shift-left" approach for early testing, ensuring continuous improvement.

Outcome: Timely rollout of mission-critical applications, improved operational efficiency, and enhanced customer experiences.

Leading Bank in the Middle East

Challenge: Transition to a fully digital bank by modernizing the core banking platform.

Solution: Designed and executed a test strategy, reducing regression testing efforts by 30%.

Outcome: Supported the digital transformation process, enabling the institution to become the region's first digital-only bank.

Leading Commercial Bank in the Southwest Pacific Region

Challenge: Upgrade the Flexcube core banking system for next-generation banking needs.

Solution: Conducted end-to-end testing of 20+ Flexcube modules across seven countries.

Outcome: Improved banking operations, real-time risk analysis, and successful multi-country implementation.
