

Multi country Finacle OCH and Core upgrade–UAT

Business Outline – Client

One of our banking clients was undertaking implementation of Finacle Core for Rwanda region and OCH for Rwanda, Kenya, and Tanzania. Bank approached Yethi to implement Tenjin and carry out the UAT testing on an automation first approach to meet stringent go-live timelines.

Project Scope:

- Tenjin configuration for Finacle CBS instance for Rwanda and OCH instance for Rwanda, Kenya, and Tanzania
- Design UAT Test cases for each instance
- A round of test execution through Tenjin
- Training and Handover

Challenges Faced

- Tenjin configuration was required on wide scale
- Test design and configuration had to be completed within the strict project deadline
- Severe defects had to be highlighted and fixed

Quick Facts

Industry

- Banking

Influential Factors

NA

Headquarters

- Africa,

Location - Rwanda, Kenya, and Tanzania

Yethi Solution

- Finacle applications like **Finacle CBS 11.810.1.06** and **Finacle OCH 11.0.8** were configured in Tenjin
- 210 Menus and 147 Menus were configured in Tenjin for Finacle OCH and Finacle CBS
- Over 6,500 and 2,900 automation test cases designed and configured in Tenjin for Finacle OCH and Finacle CBS respectively

Business Impact

- Project executed within the given timelines without any slippages
- Over 40% high quality severe defects identified
- Over 4X savings achieved through first automation approach
