What is Digital?

Digital is the fusion of the end user experience with infrastructure, processes and tools to enable rapid delivery of product value to consumers. It ensures consistency of brand across multiple channels and consumer platforms.

- What this means is that IT is now at the forefront of business transformation. Consequently, the stakes are higher than ever for IT to deliver better value, faster and more efficiently.
- An important challenge that digital transformation brings about is the increasing complexity of the application landscape.
- The interconnectedness of applications and need to test them on different device configurations pose significant challenges for the QA teams.
- With the digital revolution, newer technologies are being adopted at a much faster pace.
- Dev cycles are getting progressively shorter and faster.
- Dev methodologies are moving to Agile and DevOps. Consequently, there is increasing pressure on QA teams to reduce turnaround times and release code to production.

Yethi delivers the best-of-breed assurance services for premier clients in the digital banking space, both onsite and offshore.
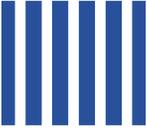

Digital Banking and Offshore Testing

Digital Testing & Yethi's Offshore Testing Capabilities

- Offshore testing resources can prove to be efficient and cost effective (approx. 30%-40% lower than onsite resources), if it is tightly and knowledgeably managed. Yethi's each offshore project is headed by an expert consultant working seamlessly with your onsite team.
- We can quickly scale capacity to meet the needs of your business.
- Additionally, by harnessing Time Zone differences, we can jointly create a continuous testing cycle. As soon as your team concludes their working day, the offshore team can continue the workload in a seamless and coordinated manner.
- Our highly experienced testing & digital consultants understand the processes and technologies involved in digital projects. They possess best practices skills gained from continual training and development as well as real-world experience working with clients across a variety of domains in the Banking and Financial Services space.

In today's challenging environment, the challenges of business continuity can be addressed through offshore testing of the digital platform.

Yethi's scriptless test automation platform, Tenjin, is a plug-and-play banking aware solution, with distinctive features like robotic capabilities to learn the application and re-learn after any updates, so regardless the complexity and number of updates, the test execution is really fast, minimizing manual effort.

- Works flawlessly across multiple applications.
- Developed with cutting edge technology, yet business user friendly with minimal tech skills required.
- Works seamlessly both in a traditional waterfall model and agile mode.
- Leverages Yethi's substantial repository of 400,000 test cases and over 2000 person years of experience across multiple global banking software platforms.

Tenjin delivers automation in test portfolios, agility of in-sprint regression testing and up to 35% reduction in cost & cycle time using risk-based testing methodologies.
